

Esri Demographic Data Release Notes: Croatia

Release: June 2018

Introduction

The Esri demographic dataset for Croatia provides key population, and household attributes for use in a variety of applications. Release notes provide information such as the attribute list, vintage, source, and changes to the dataset. The [methodology](#) document provides additional information regarding methods and definitions. Refer to the associated csv file for a list of attributes.

Esri demographic datasets are part of the [Living Atlas of the World](#). The Living Atlas is an incredible collection of maps and apps from around the world. It features Esri and user content, that can enhance your research and analysis. You too can contribute your maps, apps, and story maps through the [Living Atlas contributor app](#).

Using Demographic Data

Government agencies use demographic data to provide better services to citizens. Marketers use demographic data to select store locations, target customers, and improve product mix. Utilities use demographic data to understand population changes in their service areas and to plan growth and distribution accordingly.

When you map Esri demographic layers along with your data, you can answer questions such as “who are my customers?” and “where should we open the next store?” For example, map your retail locations or offices on top of Esri demographic attributes such as population, age, and purchasing power, to understand the local community from a demographic perspective. Once you see the general pattern, Esri products such as [ArcGIS Online](#), [Business Analyst](#), and [ArcGIS Maps for Office](#), can help you find other suitable locations for new stores based on actionable criteria.

Use the [Data Browser](#) in Esri products such as [ArcGIS Online](#), [Business Analyst](#) and [ArcGIS Maps for Office](#) to easily find the attributes you want. Browse by category such as **Age**, or search by **Alias Name**, as shown below:

Map the attributes you select using the dataset’s features, or create your own custom analysis areas. Esri products calculate new attribute values and answer questions such as “How many older people live within a five minute drive of the proposed clinic?”

Dataset Information

Croatia	
3 Letter ISO Country code	HRV
Currency	Croatian Kuna
3 Letter Currency code	HRK
Number of attributes available	133
Number of geography levels	7

Geographic Levels and Feature Counts

	Geography Levels Available for Croatia	Geography Levels Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Regions	X	X	2
Postcodes1	X		5
Postcodes2	X		20
Counties	X	X	21
Municipalities	X	X	556
Postcodes5	X		857

Attributes

Refer to the associated csv file for a list of attributes. The following information is included for each attribute:

Variable ID Unique variable ID that consists of no more than 10 characters

Alias Name Description associated with **Variable ID**.

Category Shows the [Data Browser](#) category for each attribute.

Data Collection Shows the data collection within the **Category**.

Field Category Shows the field category within the **Data Collection**.

Long Description Long description associated with Variable ID.

Esri Demographic Data Release Notes: Croatia

Release: June 2018

Year Vintage represents the year for which projections were created.

Change Summary

Changes to geography level names

None.

New Attributes

Attribute Name	Alias Name	Category
HINC01_CY	2017 HHs: 1st Quintile (Below 52,343 HRK)	Income
HINC02_CY	2017 HHs: 2nd Quintile (52,343 to 88,392 HRK)	Income
HINC03_CY	2017 HHs: 3rd Quintile (88,393 to 128,435 HRK)	Income
HINC04_CY	2017 HHs: 4th Quintile (128,436 to 188,821 HRK)	Income
HINC05_CY	2017 HHs: 5th Quintile (188,822 HRK and above)	Income

Attributes no longer available

None.
