

Esri Demographic Data Release Notes: Uruguay

Release: September 2017

Introduction

The Esri demographic dataset for Uruguay provides key population and household attributes for use in a variety of applications. Release notes provide information such as the attribute list, the data's vintage, source, and changes to the dataset. The [methodology](#) document provides additional information regarding methods and definitions.

The September 2017 release includes the following updates to the existing [ArcGIS Online](#) service and maps for Uruguay:

- The demographic data's vintage was updated from 2014 to 2016 (with the exception of Unemployed Population which was updated from 2013 to 2015).
- The layer ID schema was updated to match new/removed geographies and generalizations.

Esri demographic datasets are part of the [Living Atlas of the World](#). The Living Atlas is an incredible collection of maps and apps from around the world. It features Esri and user content that can enhance your research and analysis. You too can contribute your maps, apps, and story maps through the [Living Atlas contributor app](#).

Using Demographic Data

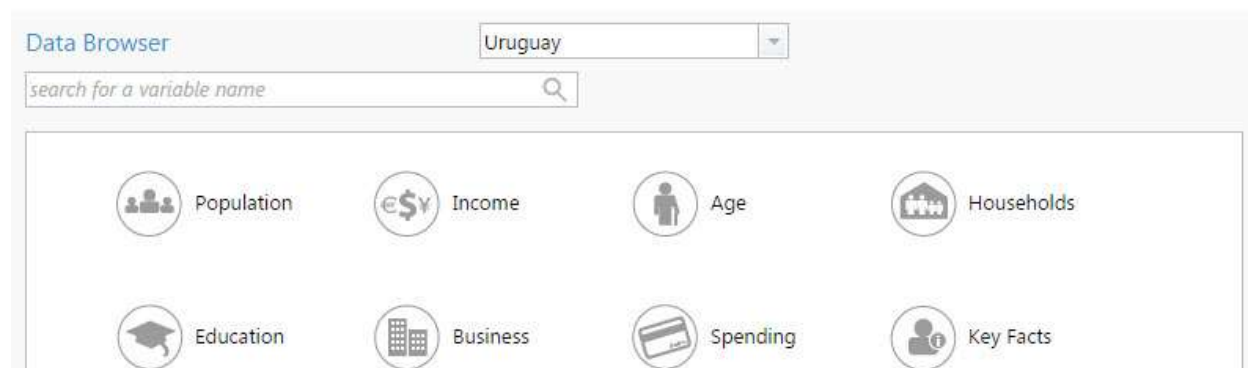

Government agencies use demographic data to provide better services to citizens. Marketers use demographic data to select store locations, target customers, and improve product mix. Utilities use demographic data to understand population changes in their service areas and to plan growth and distribution accordingly.

When you map Esri demographic layers along with your data, you can answer questions such as, Who are my customers? and Where should we open the next store? For example, map your retail locations or offices on top of Esri demographic attributes such as population, age, and purchasing power to understand the local community from a demographic perspective. Once you see the general pattern, Esri products such as [ArcGIS Online](#), [Business Analyst](#), and [ArcGIS Maps for Office](#), can help you find other suitable locations for new stores based on actionable criteria.

Use the [Data Browser](#) in Esri products such as [ArcGIS Online](#), [Business Analyst](#), and [ArcGIS Maps for Office](#) to easily find the attributes you want. Browse by category such as **Age**, or search by **Alias Name**, as shown below:
