WHO ARE WE?

Pacific Heights is one of the smaller markets (with less than 1 percent of households), composed of upscale neighborhoods in the urban periphery of metropolitan areas, along the Pacific Coast in California, in Hawaii, and in the Northeast. This market includes the highest percentage of Asian and multiracial populations; many of them born outside the US. This is a family market, distinguished by married-couple families, with and without children, some in multigenerational households. They own their homes, mainly high-priced single-family homes, with a higher proportion of town houses. Workers are generally employed in white collar occupations such as business, computer, architecture, and engineering roles. Median household income and net worth are much higher than the US. These trendy residents buy nice food and clothing, as well as the latest gadgets. They keep up with family overseas with frequent phone calls and foreign travel.
