

RELEASE NOTES

These release notes highlight some general information about SMP for ArcGIS Europe TomTom 2017 Release 2 as well as the changes between 2017 Release 2 and 2017 Release 1.

1) System Requirements:

- ArcGIS Desktop or ArcGIS Server 10.4.1 or later
See <http://links.esri.com/streetmap-premium/2017/sys-regs>

2) Patches and Service Packs (strongly recommended):

- **10.4.1 Geocoding General Maintenance Patch** for addressing performance and stability issues when geocoding with ArcGIS Desktop, Engine, and Server
See <http://links.esri.com/streetmap-premium/2017/current-patches-and-service-packs>

3) My Esri Download or Media Contents:

- EUTT_2017R2_Documentation.7z** - Documentation folder (contains Help.htm) QuickStartGuide and Release Notes files
- EUTT_2017R2_FGDB.7z.[001...00n]** - MXD and StreetMap_Data folders
- EUTT_2017R2_Locators.7z.[001...00n]** - Locators folder with *.lox and *.loc.xml files; *does not contain the *.loc files which are sent by Esri Customer Service (depending on the geography licensed) along with the product license file.*

Refer to the QuickStartGuide.pdf for more information. Note that the QuickStartGuide is now in PDF format rather than HTML.

4) Data Size:

<u>2017R2:</u>	73.3GB;	<u>2017R1:</u>	73.1GB
a. FGDB dataset	44.4GB;		44.7GB
b. Locators	28.9GB;		28.4GB

5) **Dataset Changes:**

FGDB

- i. Dataset based on TomTom 2017.06 vintage
- ii. Map Document (MXD) is provided in ArcGIS 10.4.1 version only for use with ArcGIS 10.4.1 or later.

Point Feature Classes

- iii. **Landmark_cities** attributes
Dropped: AREA, PERIMETER, CITIES_, CITIES_ID, PORT_ID, OBJECTID_1, Landmark

Line Feature Classes

- iv. No changes

Polygon Feature Classes

- v. No changes

Tables

- vi. No changes

Refer to the Data Dictionary section in the Help.htm for more information.

6) **Locator Changes:**

ITA – ITA_PointAddress locator fixed to enable setting "Derive output geometry from display fields" from 'No' to 'Yes'.

Refer to the 'About the address locators for geocoding' section in the Help.htm for more information.

7) **Routing/Network Dataset Changes:**

Street segments coded with **Agreement Concerning the International Carriage of Dangerous Goods by Road (ADR)** tunnel categories have been incorporated into the 'Any Hazmat Prohibited' restriction attribute. ADR tunnel categories are related to the regulation of the transport of hazardous materials mainly in tunnels. However, in some cases ADR tunnel categories are also assigned to underpasses/roads under bridges which means the restriction attribute can occur on street segments that are not part of a tunnel.

Refer to the 'About the routing service' section in the Help.htm for more information.

8) Deprecations:

The 'AverageTravelTime' impedance has been deprecated. Use the 'Minutes' impedance instead.
