

FUTURE GENERATION:
BUILDING A RESPONSIVE
CONNECTED ENVIRONMENT

(or)

The Answer is Not GPS

Sherrie Bolin
President
The Bolin Group

What IS The Future Generation?

- Sometimes called the “Internet of Things”
- Sometimes called “Next Generation Network”
- Sometimes called Unordered Chaos
- We call it *fGen*

Requires a responsive connected environment

THE KEY TO THE RCE

- It is about Technology *AND* Management
- The technology is being developed
 - More and more uses for computation
 - More and more devices
- Complex systems management is lagging
 - Disciplines aren't talking to one another
 - No venue for “general systems theory”

THE RCE WORKSHOP

- Starts cross discipline collaboration
- Integrates today's technologies with tomorrow's innovations
- Combines current ideas & technologies to create fGEN capabilities that solve business problems
- Tests whether this collaborative model can act as a substitute for more formal general systems theory

“It is not enough that you should understand about applied science. Concern for the man himself and his fate must always form the chief interest of all technical endeavors; concern for the great unsolved problems of the organization of labor and the distribution of goods in order that the creations of our minds shall be a blessing and not a curse.”

—Albert Einstein
