

Address Coder Product Life Cycle Support Status

The Product Life Cycle Support Policy is designed to help communicate to ESRI users the technical support resources available during a product's life span and to provide advanced notification of planned changes to available support options. Read more about this in our [Product Life Cycle Support Policy](#).

Notes:

- Product name changed from Community Coder to Address Coder in 2009.
- This product moves from the General Availability phase to the Mature phase when a new version is released. Only the latest software release receives software patches or hot fixes.
- Because of the nature of the data content, we generally do not support older versions. Each version contains the updated demographic, Tapestry, and geocoding source data.
- Also, prior to 2008, this product's licenses timed out. The product becomes un-useable, other than in demonstration mode, after the expiration date of the user's license.

Version	Release Date	General Availability	Extended Support	Mature Support	Retired	Notes
Address Coder 10 (2010 Data)	Dec-10	x
