

StreetMap Premium Data Product Life Cycle Support Status

The Product Life Cycle Support Policy is designed to help communicate to Esri users the software and technical support resources available during a product's life span and to provide advanced notification of changes to available support options. Read more about this in our [Product Life Cycle Support Policy](#)

Notes:

- All data products sold by ESRI will follow a 2-stage product life cycle as shown. Once a version of a data product becomes available, the previous version will be retired.
- Dates listed in a support column provide the date on which the product entered that support level.
