

Esri Geoportal Server Product Life Cycle Support Status

The Product Life Cycle Support Policy helps communicate to ESRI users the technical support resources available during a product's life span and to provide advanced notification of planned changes to available support options. Read more about this in our [Product Life Cycle Support Policy](#). Notes:

- Version 10 was the last release of the ArcGIS Server Geoportal extension. It is now an open source product under the name Esri Geoportal Server.
- The Esri Geoportal Server will have periodic releases identified as supportable and listed in this document.
- Users who deploy builds between supportable releases not listed in this document will be able to use the community user forum for help with support items, but will not be able to use Esri technical support. Please refer to the [Esri Geoportal Server homepage](#) for more information.
- Although the components of the Esri Geoportal Server such as the search widgets, desktop extensions, Ontology Service and OpenLS Connector are available with the Esri Geoportal Server, they are dependent on underlying technology, such as the ArcGIS version, the Flex framework version, etc. Therefore these components may have their own release schedule and do not necessarily follow the Product Life Cycle of the Esri Geoportal Server.
- Supported versions of the Esri Geoportal Server will identify which version of each of the components is included.
- All service packs, patches, and hot fixes available for a particular version have the same support status as the version they address.
- Dates listed in a support column provide the date on which the product entered that support level.

Version	Release Date	General Availability	Extended Support	Mature Support	Retired	Notes
Esri Geoportal Server 1.0	Jan 2011	X				Open source Product
ArcGIS Server Geoportal Extension 10	Aug 2010		X January 2011			Last release of the ArcGIS Server Geoportal extension
