ArcGIS Business Analyst 9.1 on PC-Intel Windows XP Professional Edition

<i>Product:</i>	ArcGIS Business Analyst 9.1
<i>Platform:</i>	PC-Intel
<i>Operating System:</i>	Windows XP Professional Edition
<i>Service Packs/Patches:</i>	SP1
<i>Shipping/Release Date:</i>	September 22, 2005

Hardware Requirements

CPU Speed:

1.0 GHz recommended or higher

Processor:

Intel Pentium or Intel Xeon processor

Memory/RAM:

1 GB minimum, 2GB or higher recommended

Display Properties:

Greater than 256 color depth

Swap Space:

300 MB minimum

Disk Space:

6.3 GB NTFS for complete software and data

Disk Space Requirements:

Approximately 350 MB of space is needed in the ArcGIS Desktop installation location (for example, C:\Program Files\ArcGIS). This is required to install the necessary Business Analyst program and data files. In addition, up to 50 MB of disk space maybe needed in the Windows System directory (typically C:\Windows\System32). You can view the disk space requirement for each of the 9.1 components in the Setup program.

Notes:

Microsoft .NET Framework 1.1 Requirement

Prior to installation, you will need to verify that you have the Microsoft .NET Framework 1.1 installed. Go to Start > Control Panel > Add/Remove Programs to see if Microsoft .NET Framework 1.1 appears in the program listing. If it does appear, you can proceed with the installation. If it does not appear, you can go to the link below, download the Microsoft .NET Framework 1.1 update and install it on your computer.

Internet Explorer 6.0 Requirement

Some features of ArcView 9.1 require a minimum installation of Microsoft Internet Explorer Version 6.0. If you do not have an installation of Microsoft Internet Explorer Version 6.0 or higher, you must obtain and install it prior to installing ArcView.

Python Requirement for Geoprocessing

ArcGIS Desktop geoprocessing tools use the Python scripting language and require that Python and the Python Win32 extension are installed. If the ArcGIS Desktop setup does not find Python on the target computer, it will install Python 2.1 and Win32all-151 extension during a typical or complete installation. You may choose a Custom installation to unselect the Python feature to avoid installing these features. See the install guide for additional information concerning Python.

License Manager

A simple TCP/IP, network card or Microsoft Loopback Adapter is required for the License manager to work.
