*Segment 66, *Unclassified*, is not displayed in the Summary Table.

** 2007-2011 American Community Survey

*** The Diversity Index summarizes racial and ethnic diversity. The index shows the likelihood that two persons, chosen at random from the same area, belong to different race or ethnic groups. The index ranges from 0 (no diversity) to 100 (complete diversity). For example, the diversity score for the U.S. is 62 which means there is a 62 percent probability that two people randomly chosen from the U.S. population would belong to different race or ethnic groups.
