

PLTS for ArcGIS Licensing

Production Line Tool Set (PLTS) for ArcGIS is a collection of turnkey software applications developed to extend ArcGIS for high-volume database production, maintenance, quality control (QC), cartographic product generation, and work flow management. See the following link for more details. <http://www.esri.com/software/arcgis/extensions/plts/index.html>

PLTS Foundation

PLTS Foundation provides the basic database editing tools and [PLTS components](#) found within each solution as well as the ability to implement customized business rules in the data modeling, attribution, validation, and output processes. When licensing PLTS foundation, you will receive a feature name for the two PLTS components and the PLTS Foundation Tools component (this component is not available for individual purchase).

| <i>PLTS Foundation</i> | <i>License Feature Name</i> |
|-------------------------------|------------------------------------|
| Foundation Tools | Foundation |
| MPS & MPS-Atlas | MPSAtlas |
| GIS Data ReViewer | DataReViewer |

PLTS Components

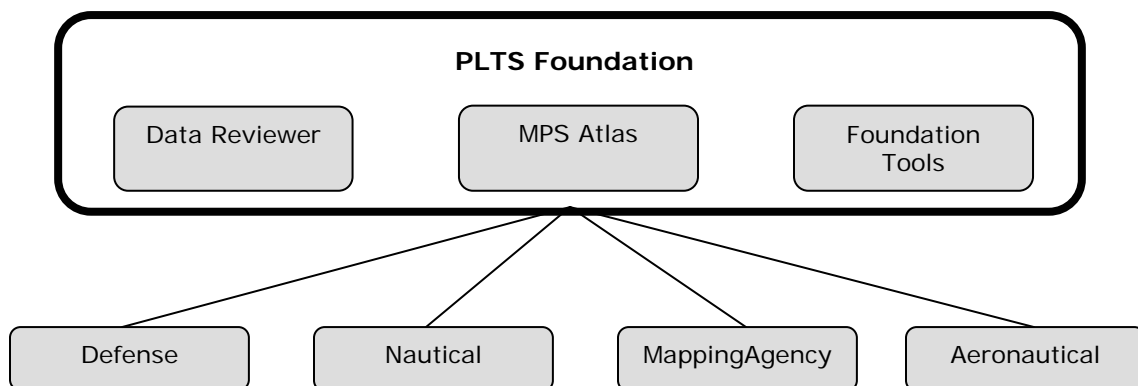

MPS & MPS-Atlas and GIS Data ReViewer, components of Foundation, are products that can be purchased individually and used as stand alone applications.

| <i>Component</i> | <i>License Feature Name</i> |
|-------------------------|------------------------------------|
| MPS & MPS-Atlas | MPSAtlas |
| GIS Data ReViewer | DataReViewer |

PLTS Solutions

PLTS Solutions are highly specialized applications that provide industry specific business rules for data modeling, attribution, validation, and output. PLTS solutions listed below can be added on to PLTS Foundation. Each solution requires an individual solution license as well as the three licenses above that comprise the PLTS Foundation product.

| <i>Solution</i> | <i>License Feature Name</i> |
|------------------------------|------------------------------------|
| PLTS Defense Solution | Defense |
| PLTS Nautical Solution | Nautical |
| PLTS Mapping Agency Solution | MappingAgency |
| PLTS Aeronautical Solution | Aeronautical |

All PLTS applications can be licensed as either Single Use or Concurrent Use.
