Change Notes

Market Data are now projections for 2022 (before: 2020). New input data from the Census 2020 was used for calculations.

The settlement points have been updated with newer and more detailed data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes
