

Anguilla

Release: October 2023

Data Source

Release: October 2023

Data: © Michael Bauer Research GmbH 2023 based on © Anguilla Statistics Department, UN.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2023.

Settlement Points: These settlement points were created using OpenStreetMap (OSM) Building Footprints. Esri is a supporter of the OSM project, www.OpenStreetMap.org. The buildings were constrained to include only residential housing units. The buildings were verified and improved upon using the latest Esri imagery and HERE (Esri Street Map Premium Layers (LandArea, BuiltUpArea)). When necessary, household values were distributed evenly onto multiunit residential buildings using a top-down approach with the Michael Bauer Research household values from the lowest level geographies.

Dataset Information

Anguilla	
3 Letter ISO Country code	AIA
Currency	East Caribbean dollar
3 Letter Currency code	XCD
Number of attributes available	12
Number of geography levels	2

Anguilla

Release: October 2023

Change Summary

Changes to geography level names

None.

New Attributes

None.

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2020).

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Age and sex are reported separately, not in combination.
