

# Bangladesh

Release: February 2025

## Data Source

**Release:** February 2025

**Data:** © Michael Bauer Research GmbH 2024 based on © Bangladesh Bureau of Statistics, UN.

**Boundaries:** © Michael Bauer Research GmbH, Nuremberg, Germany, 2024. Data Source for Digital Boundaries: 2024 Michael Bauer Research GmbH based on © Bangladesh Geospatial Data Sharing Platform.

**Settlement Points:** These settlement points were created using the 2023 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using the latest Esri imagery.

## Dataset Information

Bangladesh	
3 Letter ISO Country code	BGD
Currency	Bangladeshi taka
3 Letter Currency code	BDT
Number of attributes available	16
Number of geography levels	4

## Geography Levels

Esri Geography Name	Local Geography Name	Available through ArcGIS.com Maps	Feature Count
Country	Bāmlādesh	X	1
Regions	Bibhag	X	8
Districts	Zila	X	64
Subdistricts	Upazila	X	548

## Data Apportionment Settings

Threshold Upper Bound	Aggregation Method	Level of Geography
150 km	Block Apportion	BD.Subdistricts
more	Centroids In Polygon	BD.Subdistricts

# Bangladesh

Release: February 2025

## Change Summary

### Changes to geography level names

None.

### New Attributes

None.

### Attributes no longer available

None.

## Change Notes

Market Data are now projections for 2024 (previously 2022). The Purchasing Power projections in national currency for 2024 show an upward trend due to inflation.

The settlement points have been updated from 2019 Esri raster-based points to the 2023 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Age and Gender are reported separately, not in combination.
