Belarus

Release: June 2024

Data Source

Release: June 2024

Data: © Michael Bauer Research GmbH 2024 based on © National Statistical Comittee of the Republic of
                      Belarus, Eurostat.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2023.

Settlement Points: These settlement points were created using the 2022 European Commission Global Human Settlement
                      Layer (GHSL). More information about the data can be found here: https://ghslsys.jrc.ec.europa.eu.
                      The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

Dataset Information

Belarus	
3 Letter ISO Country code	BLR
Currency	New Belarusian ruble
3 Letter Currency code	BYN
Number of attributes available	121
Number of geography levels	5

Change Notes

Market Data are now projections for 2023 (before: 2022). Unemployed Persons are shown for 2022 (before 2021). The Purchasing Power projections for 2023 show an upward trend due to a significant upward revision of the 2022 Purchasing Power. Consumer Spending 2023 shows high deviations from last year's delivery due to high inflation in almost all European countries and significant volatility of the raw data of the official statistical offices in the aftermath of Covid-19 pandemic. Based on official statistics, the number of Unemployed Persons shows a significant decline due to an economic recovery after the Covid-19 pandemic. Eurostat data based on input data of the National Statistic Committee of the Republic of Belarus showed a 1% national population decline.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Households are based on per household values of respective Raioni. Age, Gender, Education, Marital Status, Unemployed Persons, Purchasing Power and Consumer Spending are based on per capita values of respective Raioni.
