Settlement Points: The settlement points utilized by this dataset were created using November 2022 OpenStreetMap (OSM) Building Footprints. Esri is a supporter of the OSM project, www.OpenStreetMap.org. The buildings were constrained to exclude nonresidential units that could be identified. The settlement points were verified and improved using Esri Imagery, Geonames, and HERE based Esri Street Map Premium Layers.

For these areas, all variables simultaneously referring to currency and population are based on the national average, and all other variables are set to zero.
