Change Summary

Changes to geography level names

None.

New Attributes

Attribute Name	Alias Name	Category
EDUC01_CY	2022 Pop 15+/Edu: Without or Presently Attending	Education
EDUC02_CY	2022 Pop 15+/Edu: Secondary General School	Education
EDUC03_CY	2022 Pop 15+/Edu: Intermediate School	Education
EDUC04_CY	2022 Pop 15+/Edu: University, Fachhochschule	Education
EDUC_BASE	2022 Education Attainment Base	Education

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). Consumer Spending in 2022 in Europe shows variations compared to 2021 with shifts within categories due to the lifting of restrictions under the Covid 19 pandemic. Using new input data from the official statistics leads to deviations in Unemployment data.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Unemployed persons are based on the per capita values of the respective Gemeinden. Marital Status is shown on basis of per capita values of respective Gemeinden. For reason of data privacy for areas with less than 10 inhabitants all given data except population and household numbers are anonymized. For these areas all variables referring to currency and at the same time person related values are based on national average, all variables referring to sex and age are based on national distribution and all other variables are set to 0.
