Estonia

Release: June 2023

Data Source

Release:	June 2023
Data:	© Michael Bauer Research GmbH 2023 based on © Statistics Estonia, Eurostat.
Boundaries:	© Michael Bauer Research GmbH, Nuremberg, Germany, 2022. Data Source for Digital Boundaries: 2022 Michael Bauer Research GmbH based on. © Administrative and settlement units, Estonian Land Board, 01.04.2022. All sources modified and enhanced by Michael Bauer Research GmbH, utilization only with authorization.
Settlement Points:	These settlement points were created using the 2022 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: https://ghslsys.jrc.ec.europa.eu. The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

Dataset Information

Estonia	
3 Letter ISO Country code	EST
Currency	Euro
3 Letter Currency code	EUR
Number of attributes available	123
Number of geography levels	6

Geography Levels

Estonia

Release: June 2023

Change Summary

Changes to geography level names

None.

New Attributes

Attribute Name	Alias Name	Category
HTYP02A_CY	2022 HHs: Multi-Person Non-Family Household	Households
HTYP03A_CY	2022 HHs: Cohabiting or Married Couple	Households
HTYP04A_CY	2022 HHs: Lone Parent with Children	Households
HTYP05A_CY	2022 HHs: Multi-Family Household	Households

Attributes no longer available

Attribute Name	Alias Name	Category
HTYP02_CY	2021 HHs: Single Women	Households
HTYP03_CY	2021 HHs: Multi-person Non-family Household	Households
HTYP04_CY	2021 HHs: Married Couple without Children	Households
HTYP05_CY	2021 HHs: Married Couple with Child Under 18	Households
HTYP06_CY	2021 HHs: Married Couple with Adult Children	Households

Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). The Purchasing Power projections for 2022 show an upward trend compared to the projections for 2021 due to high inflation. Consumer Spending in 2022 in Europe shows variations compared to 2021 with shifts within categories due to the lifting of restrictions under the Covid 19 pandemic. Using new input data from the Census 2021 leads to deviations in Marital Status and Unemployment data. Educational data has been revised as part of a standardization process resulting in a significant increase of unknown educational status.

The settlement points have been updated from 2017 Esri raster-based points to the 2022 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Households are based on the per household values of the respective Omavalitsuste. Age bands, sex and unemployed persons are based on the per capita values of the respective Omavalitsuste. Households by Type are based on the per household values of the respective Omavalitsustes. Education is based on the per capita values of the respective Omavalitsuste. Marital Status is based on the per capita values of the respective Omavalitsuste. Purchasing Power is based on the per capita values of the respective Omavalitsuste. Consumer Spending is based on the per capita values of the respective Omavalitsuste.
