Settlement Points: These settlement points were created using Finland Nov 2021 Address building centroids points for Housing and Businesses with Housing ([www.avoindata.fi/data/en\\_GB/dataset/postcodes](http://www.avoindata.fi/data/en_GB/dataset/postcodes)). The points were constrained to include only residential housing units using Open Street Map Land Use data and Building Footprints. This was verified and improved upon using the latest Esri imagery.

## Dataset Information

Finland	
3 Letter ISO Country code	FIN
Currency	Euro
3 Letter Currency code	EUR
Number of attributes available	125
Number of geography levels	9

## Geography Levels

Geography Levels	Geography Levels Available for Finland	Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Large Areas	X	X	5
Postcodes1	X		10
Regions	X	X	19
Subregions	X	X	69
Postcodes2	X		100
Municipalities	X	X	309
Postcodes4	X		2967
Postcodes5	X		3023

## Change Notes

Market Data are now projections for 2023 (before: 2022). Unemployed persons are shown for 2022 (before 2021). Consumer Spendings 2023 shows high deviations to last years delivery due to high inflation in almost all European countries and significant volatility of the raw data of the official statistical offices in the aftermath of Covid-19 pandemic. Based on official statistics, the number of Unemployed Persons show a significant decline due to an economic recovery after the Covid-19 pandemic.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Unemployed Persons are based on per-capita-values of respective Kunnat. Education is based on per-capita-values of respective Kunnat. Marital Status is based on per-capita-values of respective Kunnat. For reason of data privacy for areas with less than 10 inhabitants all given data except population and household numbers are anonymized. For these areas all variables referring to currency and at the same time population related values are based on national average, all other variables are set to 0.
