Change Notes

Market Data are now projections for 2024 (previously 2022). Unemployed Persons are shown for 2023 (previously 2021). Based on official statistics, the number of Unemployed Persons shows a significant decline due to an economic recovery after the Covid-19 pandemic. The Purchasing Power projections in national currency for 2024 show an upward trend due to economic growth.

The settlement points have been updated from 2019 Esri raster-based points to the 2023 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

There is no official data available for Ap'khazet'is Avtonomiuri Respublika (the Autonomous Republic of Abkhazia).
