Release: February 2024

## Data Source

Release: February 2024

Data: © Michael Bauer Research GmbH 2023 based on © Hellenic Statistical Authority, Eurostat.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2023. Data Source for Digital Boundaries: 2023 Michael Bauer Research GmbH based on. © Hellenic Statistical Authority. All sources modified and enhanced by Michael Bauer Research GmbH, utilization only with authorization.

Settlement Points: These settlement points were created using the 2023 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using the latest Esri imagery and Michael Bauer Research 2022 population

## Dataset Information

Greece	
3 Letter ISO Country code	GRC
Currency	Euro
3 Letter Currency code	EUR
Number of attributes available	130
Number of geography levels	9

## Geography Levels

Geography Levels	Geography Levels Available for Greece	Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Decentralized Administrations	X	X	8
Postcodes1	X		8
Regions	X	X	14
Postcodes2	X		70
Regional Units	X	X	75
Postcodes3	X		322
Municipalities	X	X	333
Postcodes5	X		974

## Data Apportionment Settings

## Change Notes

Market Data are now projections for 2023 (before: 2022). Unemployed persons are shown for 2022 (before 2021). The Purchasing Power projections for 2023 show an upward trend due to an upward revision of the purchasing power 2022. Consumer Spendings 2023 shows high deviations to last years delivery due to high inflation in almost all European countries and significant volatility of the raw data of the official statistical offices in the aftermath of Covid-19 pandemic. Based on official statistics, the number of Unemployed Persons show a significant decline due to an economic recovery after the Covid-19 pandemic. 1.97% national population decrease: Population decline following Eurostat data based on input data of the Hellenic Statistical Authority.

The settlement points have been updated from 2017 Esri raster-based points to the 2023 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Unemployed Persons are based on per-capita-values of respective NUTS3 Areas. Household Income is based on per-household-values of respective Dimoi. Household Types are based on per-household-values of respective Dimoi. Education is based on per-capita-values of respective Dimoi. Marital Status is based on per-capita-values of respective Dimoi.
