

Croatia

Release: June 2023

Data Source

Release: June 2023
Data: © Michael Bauer Research GmbH 2023 based on © Croatian Bureau of Statistics, Eurostat.
Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2022.
Settlement Points: These settlement points were created using the 2022 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>.
The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

Dataset Information

Croatia	
3 Letter ISO Country code	HRV
Currency	Croatian kuna
3 Letter Currency code	HRK
Number of attributes available	133
Number of geography levels	6

Geography Levels

Geography Levels	Geography Levels Available for Croatia	Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Postcodes1	X		5
Postcodes2	X		20
Counties	X	X	21
Municipalities	X	X	556
Postcodes5	X		297

Change Summary

Changes to geography level names

None.

New Attributes

None.

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). The Purchasing Power projections for 2022 show an upward trend compared to the projections for 2021 due to high inflation and an upward revision of the Purchasing Power 2021. Consumer Spending in 2022 in Europe shows variations compared to 2021 with shifts within categories due to the lifting of restrictions under the Covid 19 pandemic.

The settlement points have been updated from 2017 Esri raster-based points to the 2022 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Unemployed persons are based on the per capita values of the respective Općine. Household Income is based on the per household values of the respective Općine. Households by Type are based on the per household values of the respective Općine. Education is based on the per capita values of the respective Općine. Marital Status is based on the per capita values of the respective Općine.
