Release: June 2024

## Data Source

Release: June 2024

Data: © Michael Bauer Research GmbH 2024 based on © Hungarian Central Statistical Office, Eurostat.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2023. Data Source for Digital Boundaries: 2023 Michael Bauer Research GmbH based on © INSPIRE Geoportal, CC BY 4.0. All sources modified and enhanced by Michael Bauer Research GmbH, utilization only with authorization.

Settlement Points: These settlement points were created using the 2022 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

## Dataset Information

Hungary	
3 Letter ISO Country code	HUN
Currency	Hungarian forint
3 Letter Currency code	HUF
Number of attributes available	131
Number of geography levels	9

## Geography Levels

Esri Geography Name	Local Geography Name	Available through ArcGIS.com Maps	Feature Count
Country	Hungary	X	1
Postcodes1	Postcodes1		9
Regions	Regiok	X	8
Counties	Megyek	X	20
Postcodes2	Postcodes2		83
Districts	Jarasok	X	197
Postcodes3	Postcodes3		627
Postcodes4	Postcodes4		3039
Settlements	Telepulesek	X	3177

## Data Apportionment Settings

## Change Summary

Changes to geography level names

None.

New Attributes

None.

Attributes no longer available

None.

## Change Notes

Market Data are now projections for 2023 (before: 2022). Unemployed Persons are shown for 2022 (before 2021). The Purchasing Power projections for 2023 show an upward trend due to high inflation. Consumer Spending 2023 shows high deviations from last year's delivery due to high inflation in almost all European countries and significant volatility of the raw data of the official statistical offices in the aftermath of Covid-19 pandemic. Based on official statistics, the number of Unemployed Persons shows a significant decline due to an economic recovery after the Covid-19 pandemic.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Household Income and Household Types are based on per household values of respective Települek. Education, Marital Status and Unemployed Persons are based on per capita values of respective Települek. For data privacy, population and household numbers are anonymized for all areas with less than 10 inhabitants. For these areas, all variables referring to currency and population related values are based on national average, all other variables are set to 0.
