Change Notes

Market Data are now projections for 2024 (previously 2023). Unemployed Persons are shown for 2023 (previously 2022). Population projections at the national level declined by 1.15% compared to former estimates; this difference is attributed to migration movements, a factor that is also reflected in the input data. Utilization of updated input data from official statistics has led to deviations in the number of Unemployed Persons. Utilization of new input data from the Census 2022 led to deviations in Marital Status. The Purchasing Power projection in national currency for 2024 shows an upward trend due to inflation. Consumer Spending projections in national currency for 2024 show an upward trend due to inflation and variations compared to 2023 with shifts within categories due to new data from official statistics.

Other Data Notes

For reasons of data privacy, for areas with less than 10 inhabitants, all given data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average, and all other variables are set to zero. For Postal Codes, Households by Income Quintiles, Households by Type, Marital Status, and Education are based on the distribution of the respective Települek. Unemployed Persons are based on per capita values of the respective Települek.
