Release: November 2022

Change Summary

Changes to geography level names

None.

New Attributes

None.

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2021). The Purchasing Power projections for 2022 show an upward trend due to economic growth. Consumer Spending 2022 shows deviations from 2020 with shifts within categories due to the different developments in the Covid-19 pandemic.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

There is no official data available for the six Territories without Jurisdiction or Industrial Local Councils.
