# Israel

Release: February 2025

### Data Source

Release: February 2025

Data: © Michael Bauer Research GmbH 2024 based on © Central Bureau of Statistics, UN.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2024.

Settlement Points: These settlement points were created using the 2023 European Commission Global Human Settlement

Layer (GHSL). More information about the data can be found here: https://ghslsys.jrc.ec.europa.eu.

The data was verified using the latest Esri imagery.

### Dataset Information

Israel			
3 Letter ISO Country code	ISR		
Currency	Israeli new shekel		
3 Letter Currency code	ILS		
Number of attributes available	89		
Number of geography levels	3		

# Geography Levels

Esri Geography Name	Local Geography Name	Available through ArcGIS.com Maps	Feature Count
Country	Yisra'el	Χ	1
Regions	Mechozot	Χ	6
Subregions	Moatzah Mekomit	X	238

# **Data Apportionment Settings**

### Learn about data apportionment

Threshold Upper Bound	Aggregation Method	Level of Geography
150 km	Block Apportion	IL.Subregions
more	Centroids In Polygon	IL.Subregions

## Israel

Release: February 2025

# **Change Summary**

#### Changes to geography level names

Former geography level name	New geography level name	Change reason
	Regions	New geography level
	Subregions	New geography level
Districts		No longer available
Local Councils		No longer available

#### **New Attributes**

None.

### Attributes no longer available

None.

# **Change Notes**

Market Data are now projections for 2024 (previously 2022). The Census 2022 data was used for calculations. Consumer Spending for 2024 shows variations compared to 2022 with shifts within categories due to new data from official statistics.

The settlement points have been updated from 2019 Esri raster-based points to the 2023 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

### Other Data Notes

There is no official data available for the six Territories without Jurisdiction or Industrial Subregions.
