Change Summary

Changes to geography level names

None.

New Attributes

Attribute Name	Alias Name	Category
EDUC_BASE	2022 Education Attainment Base	Education

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2021). The Purchasing Power projections for 2022 show a significant upward trend due to inflation. Using new national input data from the official statistics leads to deviations for Age and Gender.

The settlement points have been updated by constraining them to 2022 Esri World Imagery. They may produce changes to previously run values in some trade areas. In areas of low population density, these changes may be dramatic. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

None.
