Change Summary

Changes to geography level names

None.

New Attributes

Attribute Name	Alias Name	Category
EDUC_BASE	2022 Education Attainment Base	Education
MRST01_CY	2022 Marital Status: Single	Marital Status
MRST02_CY	2022 Marital Status: Married	Marital Status
MRST03_CY	2022 Marital Status: Divorced	Marital Status
MRST04_CY	2022 Marital Status: Widowed	Marital Status
MRST_BASE	2022 Marital Status Base	Marital Status

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2021). The Purchasing Power projections for 2022 show an upward trend due to inflation and economic growth. Consumer Spending 2022 shows deviations from 2020 with shifts within categories due to the different developments in the Covid-19 pandemic. Using new Census data leads to higher deviations in Population, Households and the respective dependent variables.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

None.
