## Change Notes

Market Data are now projections for 2022 (before: 2021). The Purchasing Power projections for 2022 show an upward trend compared to the projections for 2021 due to high inflation.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

North Kosovo has been excluded.
