# Kosovo

Release: June 2024

## Data Source

| | |
|---|---|
| Release: | June 2024 |
| Data: | © Michael Bauer Research GmbH 2024 based on © Kosovo Agency of Statistics. |
| Boundaries: | © Michael Bauer Research GmbH, Nuremberg, Germany, 2023. |
| Settlement Points: | These settlement points were created using the 2023 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: https://ghslsys.jrc.ec.europa.eu. The data was verified using the latest Esri imagery and Michael Bauer Research 2022 population. |

## Dataset Information

| Kosovo | |
|---|---|
| 3 Letter ISO Country code | KOS |
| Currency | Euro |
| 3 Letter Currency code | EUR |
| Number of attributes available | 41 |
| Number of geography levels | 5 |

## Geography Levels

| Esri Geography Name | Local Geography Name | Available through ArcGIS.com Maps | Feature Count |
|---|---|---|---|
| Country | Kosovo | X | 1 |
| Regions | Regjione | X | 7 |
| Postcodes1 | Postcodes1 | | 7 |
| Postcodes2 | Postcodes2 | | 28 |
| Municipalities | Komunate | X | 38 |

## Data Apportionment Settings

Learn about data apportionment

| Threshold Upper Bound | Aggregation Method | Level of Geography |
|---|---|---|
| 150 km | Block Apportion | XK.Municipalities |
| more | Centroids In Polygon | XK.Municipalities |

# Kosovo

Release: June 2024

## Change Summary

### Changes to geography level names

None.

### New Attributes

None.

### Attributes no longer available

None.

## Change Notes

Market Data are now projections for 2023 (before: 2022). The Purchasing Power projections for 2023 show an upward trend due to inflation and an upward revision of the 2022 Purchasing Power. Eurostat data based on input data of the Kosovo Agency of Statistics showed a 2% national population decline.

The settlement points have been updated from 2017 Esri raster-based points to the 2023 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Data for North-Kosovo is not available.
