## Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). The Purchasing Power projections for 2022 show a positive trend due to rising oil prices. Consumer Spending 2022 shows deviations from 2020 with shifts within categories due to the different developments in the Covid-19 pandemic. Using new input data from the official statistics leads to deviations in Education data. New national input data leads to deviations for Unemployment data. 2% national population decrease: Population decline following UN data based on input data of the Lebanon Central Administration of Statistics.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Age and sex are reported separately, not in combination. Education excludes the domestic workers.
