Settlement Points: The settlement points utilized by this dataset were created using November 2022
                                 OpenStreetMap (OSM) Building Footprints. Esri is a supporter of the OSM project,
                                 www.OpenStreetMap.org. The buildings were constrained to exclude nonresidential units
                                 that could be identified. The settlement points were verified and improved using Esri
                                 Imagery and Geonames point data.
