

# Lithuania

Release: June 2023

## Data Source

**Release:** June 2023

**Data:** © Michael Bauer Research GmbH 2023 based on © Statistics Lithuania, Eurostat.

**Boundaries:** © Michael Bauer Research GmbH, Nuremberg, Germany, 2022. Data Source for Digital Boundaries: 2022 Michael Bauer Research GmbH based on. © Registru Centras Lithuania, CC BY 4.0. All sources modified and enhanced by Michael Bauer Research GmbH, utilization only with authorization.

**Settlement Points:** These settlement points were created using the 2022 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

## Dataset Information

Lithuania	
3 Letter ISO Country code	LTU
Currency	Euro
3 Letter Currency code	EUR
Number of attributes available	119
Number of geography levels	5

## Geography Levels

Geography Levels	Geography Levels Available for Lithuania	Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Counties	X	X	10
Municipalities	X	X	60
Postcodes2	X		93
Postcodes5	X		16735

## Data Apportionment Settings

Learn about [data apportionment](#)

Threshold Upper Bound	Aggregation Method	Level of Geography
150 km	Block Apportion	LT.Postcodes5
250 km	Centroids In Polygon	LT.Postcodes5
more	Centroids In Polygon	LT.Municipalities

# Lithuania

Release: June 2023

## Change Summary

Changes to geography level names

None.

New Attributes

Attribute Name	Alias Name	Category
EDUC06B_CY	2022 Pop 10+/Edu: Unfinished Primary - Illiterate	Education

Attributes no longer available

Attribute Name	Alias Name	Category
EDUC06A_CY	2021 Pop 10+/Edu: No Primary - Illiterate	Education
EDUC07A_CY	2021 Pop 10+/Edu: Not Indicated	Education

## Change Notes

Market Data are now projections for 2022 (before: 2021). The Purchasing Power projections for 2022 show an upward trend compared to the projections for 2021 due to high inflation. Consumer Spending in 2022 in Europe shows variations compared to 2021 with shifts within categories due to the lifting of restrictions under the Covid 19 pandemic. Using new input data from the Census 2021 leads to deviations in the variables Age and Gender, Marital Status as well as for Unemployment data. Due to a new structure within the official source data, for Education higher deviations may occur in comparison.

The settlement points have been updated from 2017 Esri raster-based points to the 2022 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Households are based on the per household values of the respective Savivaldybes. Age bands, sex and unemployed persons are based on the per capita values of the respective Savivaldybes. Education is based on the per capita values of respective Savivaldybes. Marital Status is based on the per capita values of respective Savivaldybes. For reason of data privacy, for areas with less than 10 inhabitants, all given data except population and household numbers are anonymized. For these areas all variables referring to currency as well as person related values are based on the national average, all variables referring to sex and age are based on the national distribution and all other variables are set to 0.
