## Change Notes

Market Data are now projections for 2024 (previously 2023). Unemployed Persons are shown for 2023 (previously 2022). Population projections at the national level declined by 0.58% compared to former estimates; this difference is attributed to migration movements, a factor that is also reflected in the input data. Utilization of updated input data from official statistics has led to deviations in the number of Unemployed Persons. The Purchasing Power projection in national currency for 2024 shows an upward trend due to a revision of economic data. Consumer Spending projections in national currency for 2024 show an upward trend due to economic growth.

## Other Data Notes

For reasons of data privacy, for areas with less than 10 inhabitants, all given data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average, and all other variables are set to zero. For Postal Codes, Households are based on the household size of the respective Seniunijos. Age, Gender, Marital Status, and Education are based on the distribution of the respective Savivaldybes. Unemployed Persons are based on per capita values of the respective Savivaldybes.
