

# Latvia

Release: June 2023

## Data Source

Release: June 2023  
Data: © Michael Bauer Research GmbH 2023 based on © Central Statistical Bureau, Eurostat.  
Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2022.  
Settlement Points: These settlement points were created using the 2022 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using the latest Esri imagery and Michael Bauer Research 2021 population.

## Dataset Information

Latvia	
3 Letter ISO Country code	LVA
Currency	Euro
3 Letter Currency code	EUR
Number of attributes available	118
Number of geography levels	5

## Geography Levels

Geography Levels	Geography Levels Available for Latvia	Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Postcodes1	X		5
Postcodes2	X		28
Municipalities	X	X	43
Postcodes4	X		692

## Data Apportionment Settings

Threshold Upper Bound	Aggregation Method	Level of Geography
150 km	Block Apportion	LV.Postcodes4
250 km	Centroids In Polygon	LV.Postcodes4
more	Centroids In Polygon	LV.Municipalities

# Latvia

Release: May 2023

## Change Summary

Changes to geography level names

None.

### New Attributes

Attribute Name	Alias Name	Category
EDUC01_CY	2022 Pop 15+/Edu: Primary Education or Less	Education
EDUC02_CY	2022 Pop 15+/Edu: Lower Secondary Education	Education
EDUC03_CY	2022 Pop 15+/Edu: Secondary Education	Education
EDUC04_CY	2022 Pop 15+/Edu: Professional Secondary Education	Education
EDUC05_CY	2022 Pop 15+/Edu: Higher Education	Education

Attributes no longer available

Attribute Name	Alias Name	Category
EDUC01A_CY	2021 Pop 15+/Edu: Primary Education or Less	Education
EDUC02A_CY	2021 Pop 15+/Edu: Lower Secondary Education	Education
EDUC03A_CY	2021 Pop 15+/Edu: Secondary Education	Education
EDUC04A_CY	2021 Pop 15+/Edu: Professional Secondary Education	Education
EDUC05A_CY	2021 Pop 15+/Edu: Higher Education	Education

## Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). The Purchasing Power projections for 2022 show an upward trend compared to the projections for 2021 due to high inflation and real income growth 2022. Consumer Spending in 2022 in Europe shows variations compared to 2021 with shifts within categories due to the lifting of restrictions under the Covid 19 pandemic. Using new input data from the official statistics leads to deviations in Unemployment data. 1% national population decrease: Population decline following Eurostat data based on input data of the Central Statistical Bureau of Latvia. The settlement points have been updated from 2017 Esri raster-based points to the 2022 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

## Other Data Notes

Households are based on the per-household-values of the respective Novadi. Agebands, sex and unemployed persons are based on the per-capita-values of the respective Novadi. Education is based on the per-capita-values of the respective Novadi. Marital Status is based on the per-capita-values of the respective Novadi. Purchasing Power is based on the per-capita-values of the respective Novadi. Consumer Spendings are based on the per-capita-values of the respective Novadi. For reason of data privacy for areas with less than 10 inhabitants all given data except population and household numbers are anonymized. For these areas all variables referring to currency and at the same time person related values are based on national average, all variables referring to sex and age are based on national distribution and all other variables are set to 0.
