Change Notes

Market Data are now projections for 2024 (previously 2023). Unemployed Persons are shown for 2023 (previously 2022). Population projections at the national level declined by 3.09% compared to former estimates; this difference is attributed to migration movements, a factor that is also reflected in the input data. Utilization of updated input data from official statistics has led to deviations in the number of Unemployed Persons. The Purchasing Power projection in national currency for 2024 shows an upward trend due to inflation.

Other Data Notes

Transnistria is not included in the dataset. For Postal Codes, Households are based on the household size of the respective Raioane. Age and Gender are based on the distribution of the respective Raioane. Unemployed Persons, Purchasing Power, and Consumer Spending are based on per capita values of the respective Raioane.
