Maldives

Release: November 2022

Change Summary

Changes to geography level names
None.

New Attributes
None.

Attributes no longer available
None.

Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). Using new input data from the official statistics leads to deviations in the variables Age and Gender.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes
None.
