Change Notes

Market Data are now projections for 2024 (previously 2023). Unemployed Persons are shown for 2023 (previously 2022). Population projections at the national level declined by 1.26% compared to former estimates; this difference is attributed to migration movements, a factor that is also reflected in the input data. Utilization of updated input data from official statistics has led to deviations in the number of Unemployed Persons. Consumer Spending projections in national currency for 2024 show an upward trend due to inflation and economic growth.

Other Data Notes

None.
