Release: November 2022

Change Summary

Changes to geography level names
None.

New Attributes
None.

Attributes no longer available
None.

Change Notes

Market Data are now projections for 2022 (before: 2021).

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Age bands are shown on basis of per capita values of respective States Regions.
