Mongolia

Release: November 2022

Data source

Release:	November 2022
Data:	© Michael Bauer Research GmbH 2022 based on © National Statistical Office, UN.
Boundaries:	© Michael Bauer Research GmbH, Nuremberg, Germany, 2022.
Settlement Points:	WorldPop.org 100m Constrained UN adjusted projected 2020 population grid, verified with Esri imagery

Dataset Information

Mongolia	
3 Letter ISO Country code	MNG
Currency	Mongolian tögrög
3 Letter Currency code	MNT
Number of attributes available	17
Number of geography levels	3

Release: November 2022

Change Summary

Changes to geography level names
None.

New Attributes
None.

Attributes no longer available
None.

Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). The Purchasing Power projections for 2022 show a significant upward trend due to inflation. Using new input data from the official statistics leads to deviations in Households, Age and Gender as well as Unemployment data. 1% national population decrease: The new Census data showed a decline of population compared to former estimates and was included in the new projection for 2022.

The settlement points have been updated from the Esri raster-based points to the Worldpop.org raster-based points. The Worldpop.org data uses newer input data than the Esri raster-based data, more information can be found on Worldpop.org. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

Age and sex are reported separately, not in combination.
