Data Source

Release: October 2023
Data: © Michael Bauer Research GmbH 2023 based on © Instituto Nacional de Estatística, UN.
Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2023.
Settlement Points: These settlement points were created using the European Commission Global Human Settlement Layer (GHSL), 100 meter resolution 2025 Population Raster Layer. The points were verified using the latest Esri imagery. More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>.

Change Notes

Market Data are now projections for 2023 (before: 2021). The Purchasing Power projections for 2023 show a negative trend due to a revision of official macroeconomic input data.

The settlement points have been updated from Worldpop.org raster-based points to newer and more detailed raster-based points. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes
