

Montserrat

Release: October 2023

Data Source

Release: October 2023

Data: © Michael Bauer Research GmbH 2023 based on © Statistics Department of Montserrat, UN.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2023.

Settlement Points: These settlement points were created using OpenStreetMap (OSM) Building Footprints. Esri is a supporter of the OSM project, www.OpenStreetMap.org. The buildings were constrained to include only residential housing units. The buildings were verified and improved upon using the latest Esri imagery and HERE (Esri Street Map Premium Layers (LandArea, BuiltUpArea)). When necessary, household values were distributed evenly onto multiunit residential buildings using a top-down approach with the Michael Bauer Research household values from the lowest level geographies.

Dataset Information

Montserrat	
3 Letter ISO Country code	MSR
Currency	East Caribbean dollar
3 Letter Currency code	XCD
Number of attributes available	5
Number of geography levels	2

Geography Levels

Geography Levels	Geography Levels Available for Montserrat	Available through ArcGIS.com Maps	Feature Count
Country	X	X	1
Parishes	X	X	3

150 km	Block Apportion	MS.Parishes
more	Centroids In Polygon	MS.Parishes

Montserrat

Release: October 2023

Change Summary

Changes to geography level names

Former geography level name	New geography level name	Change reason
	Parishes	New geography level
Regions		No longer available

New Attributes

None.

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2022 (before: 2020). A 7% national population decrease results from new input data published by the official statistical office of Montserrat (Statistics Department) shows a decline compared to the UN figure and was included in the new projection for 2022.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

None.
