Settlement Points: These settlement points were created using 2023 OpenStreetMap (OSM) Building Footprints, Microsoft Global ML Building Footprints. More information about the data can be found here: <https://www.openstreetmap.org> and <https://github.com/microsoft/GlobalMLBuildingFootprints>. The buildings were constrained to include only residential housing units. The buildings were verified and improved upon using the latest Esri imagery.

Change Notes

Market Data are now projections for 2022 (before: 2020). Unemployed persons are shown for 2021 (before 2019). The Purchasing Power projections for 2022 show an upward trend due to significant economic growth. A slight (-0.3%) national population decrease results from following UN data based on input data of the The National Institute of Statistics and Economic Studies.

The settlement points have been updated with newer and more detailed than the previous data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes
