

Mauritius

Release: October 2023

Data Source

Release: October 2023
Data: © Michael Bauer Research GmbH 2023 based on © Statistics Mauritius, UN.
Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2023.
Settlement Points: These settlement points were created using the European Commission Global Human Settlement Layer (GHSL), 100 meter resolution 2025 Population Raster Layer. The points were verified using the latest Esri imagery. More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>.

Dataset Information

Mauritius	
3 Letter ISO Country code	MUS
Currency	Mauritian rupee
3 Letter Currency code	MUR
Number of attributes available	112
Number of geography levels	2

Release: October 2023

Change Summary

Changes to geography level names

None.

New Attributes

None.

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2023 (before: 2021). Unemployed persons are shown for 2022 (before 2020). Overall Consumer Spending increased only modestly and was concentrated on segments which had a backlog demand caused by the Corona pandemic (e.g. clothing, shoes). CSP14 (durables for recreation and culture) has high variation due to small numbers. A slight 0.2% population decline results from UN data based on input data of the Statistics Mauritius. Using new input data from the official statistics leads to deviations in Unemployment data.

The settlement points have been updated from Worldpop.org raster-based points to newer and more detailed raster-based points. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

There is no official data available for the areas of Agal ga and Saint Brandon. Total population of Agal ga and Saint Brandon 276.
