## Change Notes

Market Data are now projections for 2024 (before: 2022). 10.5% national population decrease: Population decline following UN data based on input data of the National Center for Statistics and Information. The Purchasing Power projections in national currency for 2024 show an upward trend due to inflation, economic growth and a revision of economic data.

The settlement points have been updated from 2019 Esri raster-based points to the 2023 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.
