## **Change Notes**

Market Data are now projections for 2021 (before: 2020). Unemployed persons are shown for 2020 (before 2019).

The updated settlement points have been constrained using current MBR boundaries and current Esri Imagery. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

### Other Data Notes
