

Qatar

Release: February 2025

Data Source

Release: February 2025

Data: © Michael Bauer Research GmbH 2024 based on © Planning and Statistics Authority, UN.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2024.

Settlement Points: These settlement points were created using the 2023 European Commission Global Human Settlement Layer (GHSL). More information about the data can be found here: <https://ghslsys.jrc.ec.europa.eu>. The data was verified using Esri Imagery.

Dataset Information

Qatar	
3 Letter ISO Country code	QAT
Currency	Qatari riyal
3 Letter Currency code	QAR
Number of attributes available	9
Number of geography levels	3

Geography Levels

Esri Geography Name	Local Geography Name	Available through ArcGIS.com Maps	Feature Count
Country	Qaṭar	X	1
Municipalities	Baladiyat	X	8
Subdistricts	Zones	X	90

Release: February 2025

Change Summary

Changes to geography level names

Former geography level name	New geography level name	Change reason
	Subdistricts	New geography level
Zones		No longer available

New Attributes

None.

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2024 (previously 2022). Population projections at the national level declined by 2.7% compared to former estimates; this difference is attributed to updates to United Nations data based on input data from the Statistics Authority.

The settlement points have been updated from 2019 Esri raster-based points to the 2023 European Commission Global Human Settlement Layer (GHSL) raster points. This data is newer and more detailed than the previous Esri raster-based data. These settlement points are an improvement over the previous version and could result in changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

For reasons of data privacy, for areas with less than 10 inhabitants, all given data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average; all other variables are set to zero.
