Release: November 2022

Change Summary

Changes to geography level names
None.

New Attributes

Attribute Name	Alias Name	Category
EDUC_BASE	2022 Education Attainment Base	Education
HTYP_BASE	2022 Households by Type Base	Households
MRST_BASE	2022 Marital Status Base	Marital Status

Attributes no longer available
None.

Change Notes

Market Data are now projections for 2022 (before: 2021). Unemployed persons are shown for 2021 (before 2020). The Purchasing Power projections for 2022 show an upward trend due to inflation and economic growth. Consumer Spending 2022 shows deviations from 2020 with shifts within categories due to the different developments in the Covid-19 pandemic. Using new Census data leads to higher deviations in Population, Households and the respective dependent variables. 4% national population decrease: New input data of the Singapore Department of Statistics was included in the new projection for 2022.

The updated settlement points have been constrained using current MBR boundaries. These settlement points could result in minor changes to previously run values in some trade areas. Settlement points are used in the data apportionment algorithm to redistribute data variables to input polygon features.

Other Data Notes

There is no official data available for the areas of Marina East, Marina South, Straits View, Changi Bay, Simpang, Central Water Catchment and Western Islands. For the areas of Boon Lay, North-Eastern Islands, Paya Lebar, Pioneer, Tengah and Tuas due to official data availability Agebands and Gender are set to zero. For the areas of Museum, Orchard, Southern Islands, Paya Lebar, Lim Chu Kang, Sungei Kadut, North-Eastern Islands, Seletar, Boon Lay, Pioneer, Tengah, Tuas and Western Water Catchment due to official data availability Household by Income, Households by Type, Unemployment, Purchasing Power and Consumer Spending data are set to zero.
