Change Notes

Market Data are now projections for 2024 (previously 2023). Unemployed Persons are shown for 2023 (previously 2022). Population projections at the national level declined by 1.97% compared to former estimates; this difference is attributed to migration movements, a factor that is also reflected in the input data. Utilization of updated input data from official statistics has led to deviations in the number of Unemployed Persons. The Purchasing Power and Consumer Spending projections in national currency for 2024 show an upward trend due to inflation and economic growth.

Other Data Notes

For reasons of data privacy, for areas with less than 10 inhabitants, all given data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average, and all other variables are set to zero. For Postal Codes and Micro level geographical areas, Marital Status is based on the distribution of the respective Opstine. Unemployed Persons are based on per capita values of the respective Opstine. For Postal Codes and Micro level geographical areas of Bujanovac and Preševo, Households by Income Quintiles and Education are based on the distribution of the respective Opstine. Purchasing Power and Consumer Spending are based on per capita values of the respective Opstine.
