None.

Change Notes

Market Data are now projections for 2023 (before: 2022). Unemployed Persons are shown for 2022 (before 2021). The Purchasing Power projections for 2023 show an upward trend due to high inflation. Consumer Spending 2023 shows high deviations from last year's delivery due to high inflation in almost all European countries and significant volatility of the raw data of the official statistical offices in the aftermath of Covid-19 pandemic. Based on official statistics, the number of Unemployed Persons shows a significant decline due to an economic recovery after the Covid-19 pandemic.

No changes were made to these settlement points since the last MBR release.

Other Data Notes

For data privacy, population and household numbers are anonymized for all areas with less than 10 inhabitants. For these areas, all variables referring to currency and population related values are based on the national average, all other variables are set to 0.
